

Brian Feuerman

Hydesville CA, 95547 | (707) 382-5230 | brian@brianfeuerman.com | linkedin.com/in/brianfeuerman | brianfeuerman.com

Goal

“Seeking a Summer 2026 internship, bringing Python experience and hands-on thinking to support autonomy and hardware–software integration.”

EDUCATION

University of California, Los Angeles

B.S. Candidate in Aerospace Engineering

Los Angeles, CA

Expected Jun. 2027

College of the Redwoods

A.A Liberal Arts in Humanities, Language and Communication

Eureka, CA

Jan. 2020 - May. 2023

A.A. Liberal Arts in Science Exploration

EXPERIENCE

Polaris Observatory Association Under Dr. R.M. Rich

Lockwood Valley, CA

Researcher and Technician

Feb. 2026 - Present

- Collected data from 18” and 28” telescopes to study star formation within the galactic halo of distant galaxies.
- Reduced astronomical imaging data using PixInsight for communication and publication in *IOP Science*.
- Maintained remote observation systems including telescope drives, domes, and software/hardware integration.

Astronomical Society at UCLA

Los Angeles, CA

Telescope Operator

Mar. 2025 - Present

- Operated UCLA Department of Physics and Astronomy telescopes for outreach and observational programs.
- Performed telescope balancing, collimation, and setup procedures to support reliable observing sessions.
- Trained on operation of a 16” 7600 mm Boller and Chivens Cassegrain telescope.

Hydesville Elementary School District

Hydesville, CA

Summer Maintenance

Jun. 2024 - Sep. 2024

- Completed facilities maintenance tasks including landscaping, sanding, painting, and power washing.
- Followed and revised equipment safety procedures to support safe and efficient maintenance work.
- Coordinated daily maintenance responsibilities across school facilities and outdoor work areas.

Friends of the Van Duzen

Carlotta CA

Researcher

2015- 2023

- Collected watershed data using temperature probes, dissolved oxygen test kits, turbidity meters, and pH strips.
- Worked in a team of five to process environmental data and assess watershed health for salmon spawning.
- Coordinated transportation logistics to collect time-sensitive watershed samples across multiple sites.

Projects

Rocket Project at UCLA

Los Angeles, CA

Ground Systems Engineering

Sep. 2023- June 2024

- Tested and leak-checked fill table components for a hybrid propellant rocket ground system.
- Supported launch operations for a hybrid propellant rocket that reached over 14,000 feet.
- Assisted with ground systems preparation, safety checks, and launch readiness procedures.

Personal Project

Los Angeles, CA

Machine Vision

~2024

- Built a PyTorch machine vision model to recognize handwritten English alphanumeric characters.
- Achieved 99.4% test accuracy through model training, evaluation, and performance tuning.
- Processed image datasets and implemented training workflows for character classification.

Personal Project

Los Angeles, CA

Stock Trading Model

~2025

- Developed a random forest model to predict stock price behavior using 25,296 financial data points.
- Achieved 0.0305 RMSE during model evaluation on stock market prediction data.
- Engineered financial features and evaluated model performance for algorithmic trading research.

SKILLS AND INTERESTS

Technical Skills: C++, MATLAB, Python, HTML, Javascript, Thermodynamics, Machine Learning, Fluid Mechanics, Numerical Methods, Control Systems, Networking, Linux

Interests: Astrophysics, Astrophotography, Robotics, Graphic Design, Cooking/Baking, Hiking, Swimming
